

**\*Financial Policy\***  
***Please Read Carefully***

**Our primary goal is to resolve your problem as quickly as possible. We submit your insurance claims for you. Most plans will cover our services even out of network. We bill insurance based on time spent with our patients. Because we spend more time with you than you are used to, we bill your insurance for several different services that we perform during your visit. If for any reason your insurance does not pay (deductible not met, no coverage, etc.) our fees revert to the list below and you are responsible at that point. Once your insurance starts paying, we will then accept your co-pay.**

**Payment is expected at the time services are rendered, if you are a cash patient. In the event that the fees for care would present an excessive and undue burden, please inform us.**

**Your health is our primary concern, so special considerations may be made at the Doctor's discretion.**

**Please mark the payment choice which you would prefer and sign below to indicate that you have read and understand this financial policy.**
